- 0 source not found

Tags marked AI-flagged are the AI's judgement. Check them against the quote beside each rule, and mark each rule as you go.

R1. The Finance Controller sends the close calendar to the finance lead of each entity on WD1 at 10 am.

- from SOP
- AI-flagged: no contingency documented

SOURCE QUOTE

"1. WD1, 10 am: The Finance Controller sends the close calendar to the finance lead of each entity."

R2. The FP&A analyst downloads the bank statements for all three entities from the bank portal on WD1 and saves them in the Close folder.

- from SOP
- AI-flagged: no contingency documented

SOURCE QUOTE

"2. WD1: The FP&A analyst downloads the bank statements for all three entities from the bank portal and saves them in the Close folder."

R3. The FP&A analyst prepares accrual journals in the ERP for payroll, rent, professional fees and cloud costs from WD1 to WD2.

- from SOP
- AI-flagged: no contingency documented

SOURCE QUOTE

"3. WD1 to WD2: The FP&A analyst prepares accrual journals in the ERP for payroll, rent, professional fees and cloud costs."

R4. The FP&A analyst reconciles each bank account to the ledger on WD2.

- from SOP
- AI-flagged: no contingency documented

SOURCE QUOTE

"4. WD2: The FP&A analyst reconciles each bank account to the ledger."

R5. Every unreconciled item above Rs 10,000 is listed on the Recon tab of the close workbook.

- from SOP
- AI-flagged: no contingency documented

SOURCE QUOTE

"Every unreconciled item above Rs 10,000 is listed on the Recon tab of the close workbook."

R6. Intercompany balances between the three entities are matched on WD2. • from SOP

• AI-flagged: no contingency documented

> SOURCE QUOTE
> "5. WD2: Intercompany balances between the three entities are matched."

R7. Differences above Rs 5,000 are sent to the entity finance lead for correction. • from SOP

• AI-flagged: no contingency documented

> SOURCE QUOTE
> "Differences above Rs 5,000 are sent to the entity finance lead for correction."

R8. Every journal entry above Rs 50 lakh must be approved by the Finance Controller in the ERP before it is posted on WD3. • from SOP • AI-flagged: conflict • AI-flagged: no contingency documented

> SOURCE QUOTE
> "6. WD3: Every journal entry above Rs 50 lakh must be approved by the Finance Controller in the ERP before it is posted."

Why it matters Conflict: and conflict: requires ERP approval before posting journals above 50 lakh, while permits an exception where Meera confirms by phone and ERP approval is done after the fact on WD4 for Pune.

R9. Only for the Pune cost centre, Meera confirms by phone, the call is noted in the ticket comment, and the ERP approval is raised on WD4. • from leaver • AI-flagged: conflict

> SOURCE QUOTE
> "Only for the Pune cost centre. Meera confirms by phone, the call is noted in the ticket comment, and the ERP approval is raised on WD4."

Why it matters Conflict: and conflict: allows phone confirmation and delayed ERP approval on WD4 for Pune, whereas mandates ERP approval before posting.

R10. The books are closed and the ledger is locked at the end of WD3, and no postings are allowed after the lock. • from SOP • AI-flagged: conflict • AI-flagged: no contingency documented

> SOURCE QUOTE
> "7. WD3: The books are closed and the ledger is locked at the end of WD3. No postings are allowed after the lock."

Why it matters Conflict: and conflict: states no postings are allowed after the WD3 lock, while states WD3 is only the real lock for routine postings and late items can be posted up to WD5 when requested by the CFO.

R11. The FP&A analyst prepares the variance pack comparing actuals with budget and with last month on WD3, with a comment on every line that moves by more than 5%. • from SOP

• AI-flagged: no contingency documented

> SOURCE QUOTE

> “8. WD3: The FP&A analyst prepares the variance pack comparing actuals with budget and with last month, with a comment on every line that moves by more than 5%.”

R12. The Head of FP&A reviews the variance pack and sends it to the CFO on WD4. • from SOP

• AI-flagged: no contingency documented

> SOURCE QUOTE
> “9. WD4: The Head of FP&A reviews the variance pack and sends it to the CFO.”

R13. WD3 is the real lock for routine postings. WD5 only applies when the CFO asks for a late item.

• from leaver • AI-flagged: conflict

> SOURCE QUOTE
> “WD3 is the real lock for routine postings. WD5 only applies when the CFO asks for a late item.”

Why it matters Conflict: and conflict: permits postings until WD5 upon CFO request, contradicting the absolute lock at WD3 stated in .

R14. The ledger is locked at the end of WD5, and postings after WD5 move to next month's books.

• from SOP • AI-flagged: no contingency documented

> SOURCE QUOTE
> “10. WD5: The ledger is locked at the end of WD5. Postings after WD5 move to next month's books.”

R15. Use the SGD closing rate published by the Monetary Authority of Singapore for the last day of the month. • from leaver

> SOURCE QUOTE
> “Use the SGD closing rate published by the Monetary Authority of Singapore for the last day of the month.”

Open gaps (unanswered)

Q4. If postings are allowed up to WD5 as demonstrated in Case 3, what is the exact operational purpose and timing of the WD3 ledger lock mentioned in Step 7? • open gap

---

Q5. Should currency conversion rates used for foreign bank statements be documented on the Recon tab or elsewhere in the workbook, and what format is required? • open gap • needs in-person

Q6. What is the expected turnaround time or escalation path if the entity finance lead does not correct intercompany differences before the WD3 ledger lock? ● open gap

Needs in-person

Q5. Should currency conversion rates used for foreign bank statements be documented on the Recon tab or elsewhere in the workbook, and what format is required?

Confirming unlocks the bot, which answers only from this sheet.
